

iOS And iPadOS For Business Use

About this course

Learn how to maximise the potential of your iPhone or iPad for business use. With iPadOS, discover how multitasking allows you to use more than one App at the same time. Open 2 Apps in Split View, add a 3rd with Slide Over and then even watch a Video using Picture in Picture.

Stay on task with the incredible power of Focus Modes, scan and sign documents with Apple Pencil or even have multiple contact numbers registered on your iPhone with eSIM. This course will also introduce the basics of Mobile Device Management (MDM), allowing you to understand how to maximise the use of easy set up and deploy multiple devices, quickly.

Format and duration

2 hour session delivered virtually. This can be arranged as a longer session with tailored content and also as a classroom training based on request.

Audience

If you have an iPhone or iPad that you want to use for work, are a new or existing user, this course will help you get started on the journey. Some previous experience of these devices would be useful, but not essential.

Topics in Detail >>
